It makes your business more efficient & profitable

AUTOMATE YOUR WORKFLOW

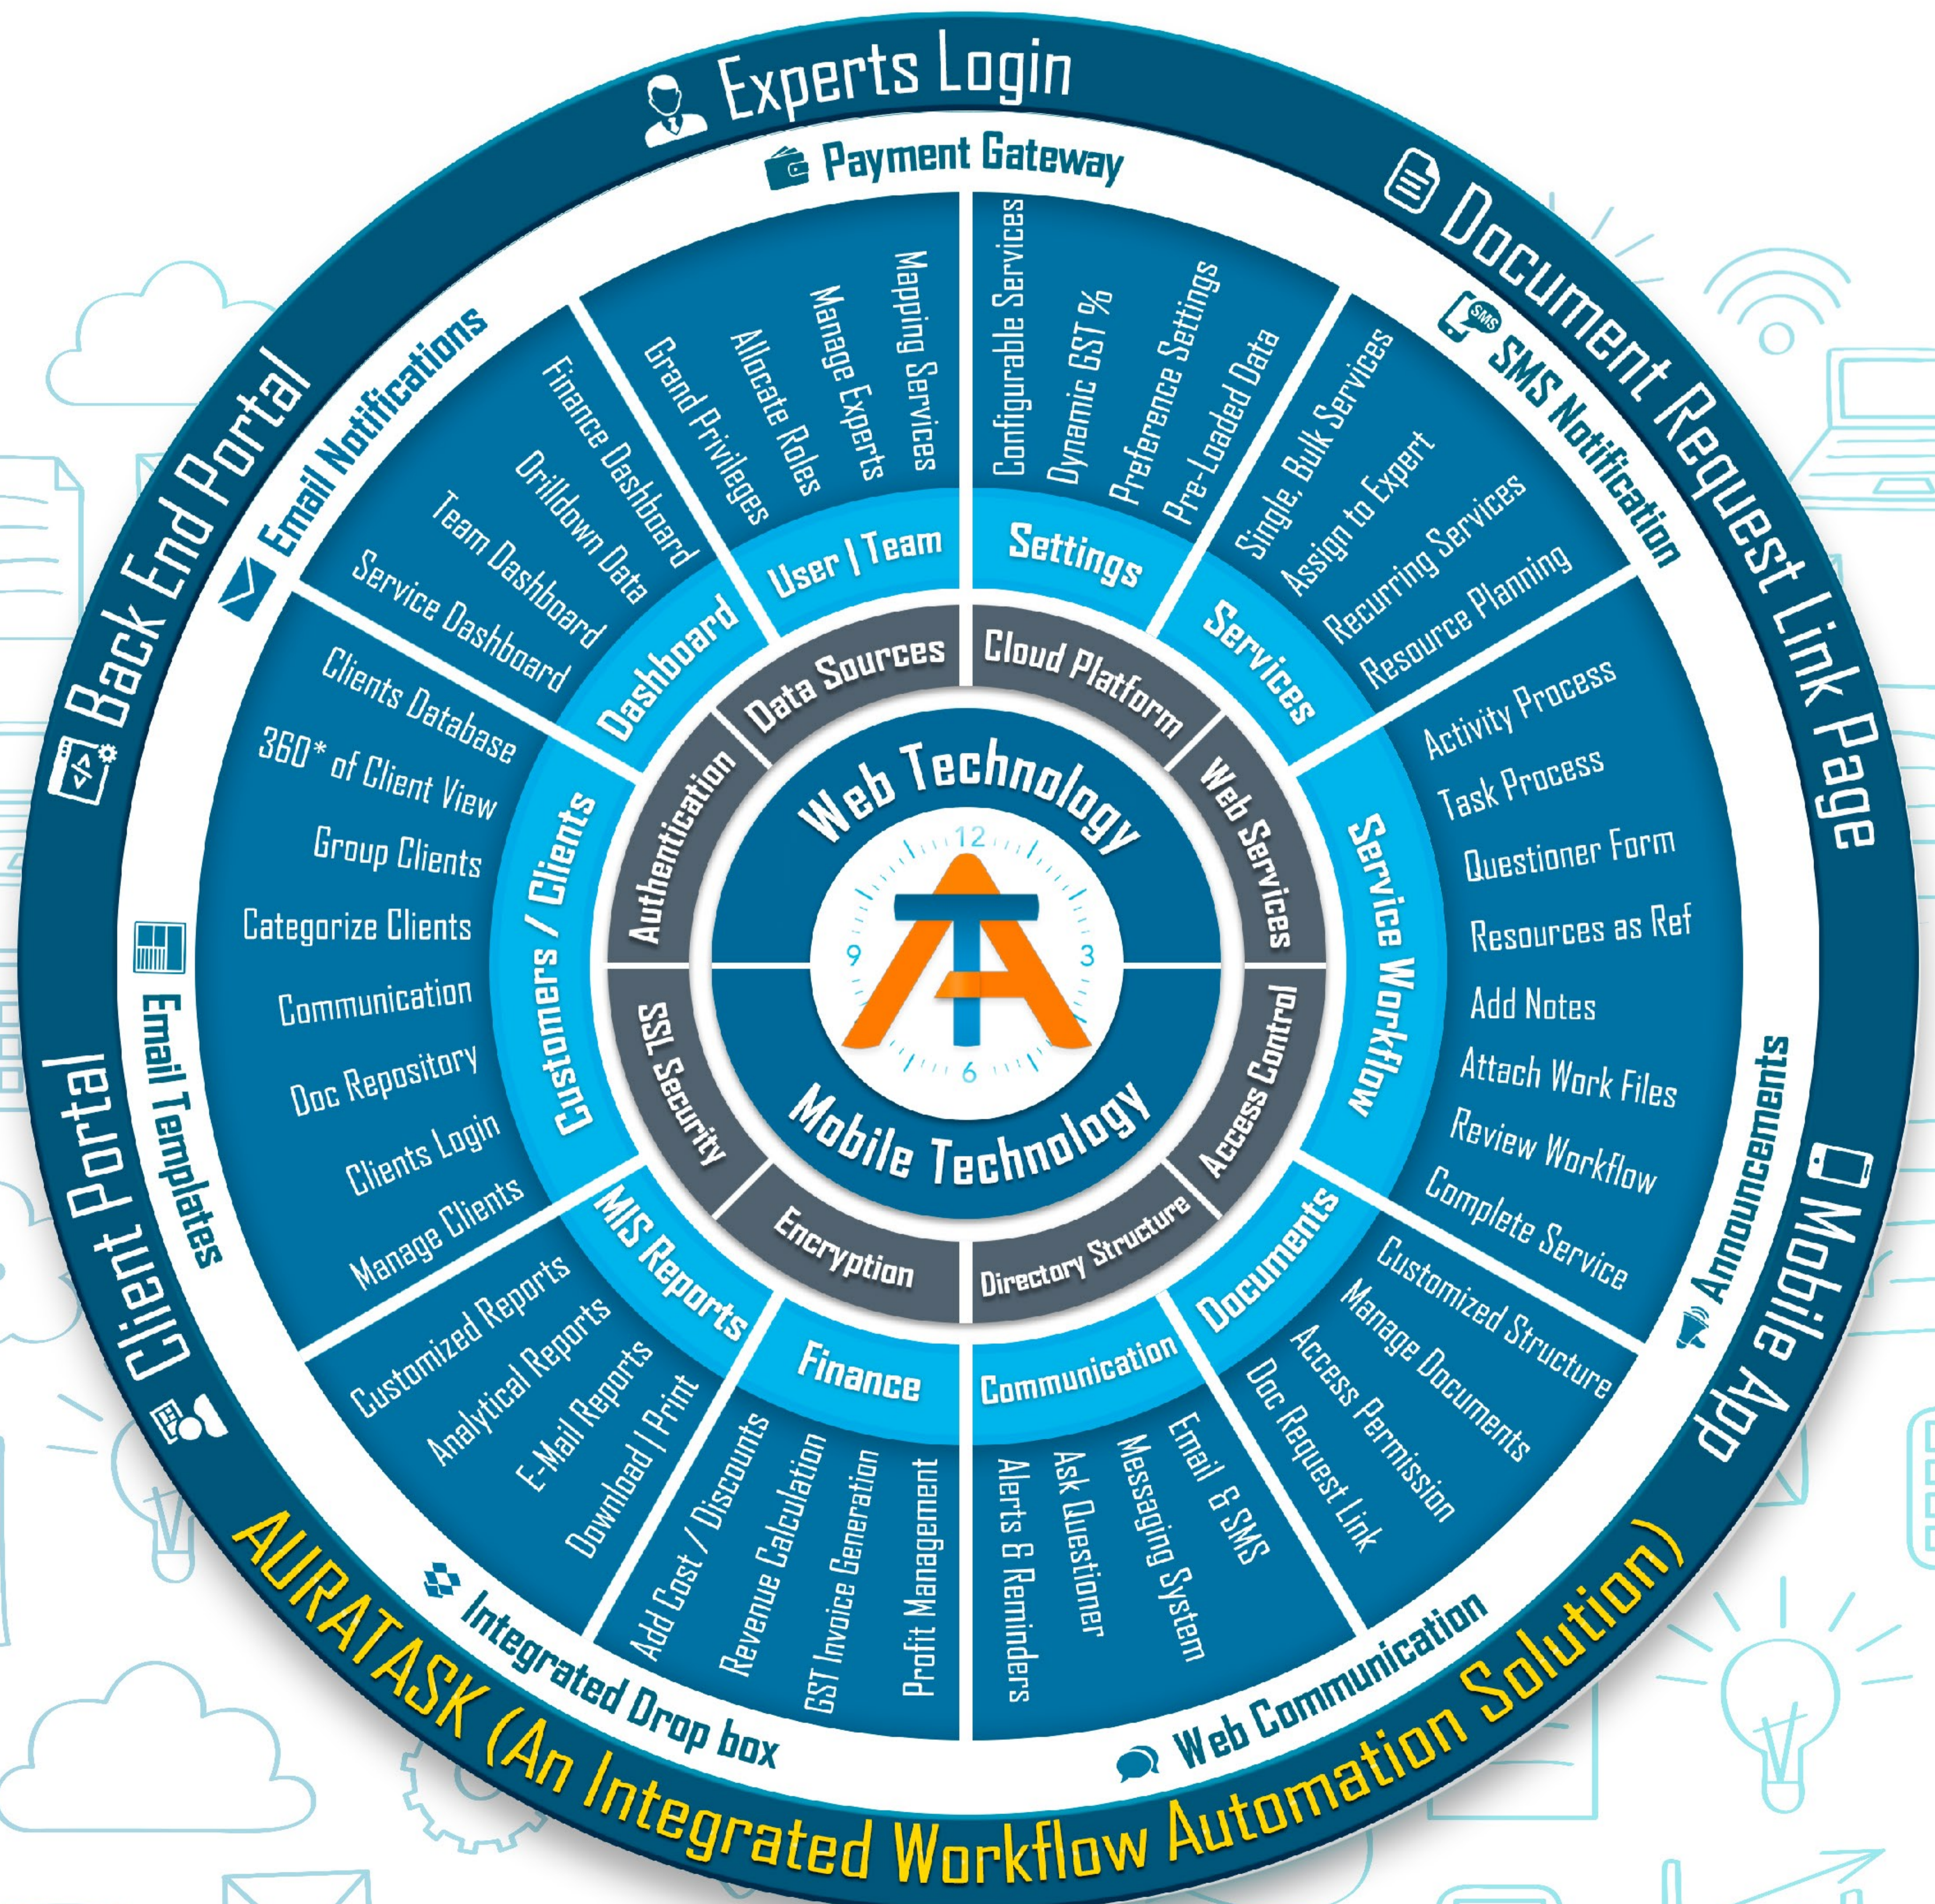

We Intend to give the best to our clients, So we build all the components in one solution.

Components

- ✓ Clients/ Customer Module
- ✓ Service Workflow Engine
- ✓ Alerts & Reminders
- ✓ Web Communication
- ✓ Document Mgt System
- ✓ Services / Work Module
- ✓ Dashboard & MIS Reports
- ✓ Finance & Invoice System
- ✓ Customer/ Client Portal
- ✓ Integrated Email & SMS
- ✓ Team / Expert Module
- ✓ Document Request Link

Solution Architecture

Key Solution

The Dashboard is an user interface that provides the comprehensive view of all the Projects/ Assignments, Team Performances, Work Schedule, Financial information and alerts/ notifications based on the roles & privileges in one customised screen. It is an integrated view of all the transactions on a day & consolidated basis which brings you quick attention rather than seeing the complex reports.

Drilldown to
Detailed Info

A client may be an Individual (or) Company (or) Trust. Create the client records by adding their KYC Info, Communication Info and Business Info. System shall generate an unique ID and allows you to create client's login credential to access the Client portal. The centralised client database is interlinked with service module, it provides client wise service / work completed & on going details.
